Abstract
Social Networking Sites (SNS), in general, can describe opinions openly; Instagram users are one example that can influence political attitudes in the digital age. Political attitudes can occur due to social phenomena, including the Coronavirus outbreak, but are explained quantitatively on the social and political situation. This is because Social Networking Sites (SNS) can be accessed by all users. This paper provides an overview of the users of Social Networking Sites (SNS), where Instagram’s influence on one’s political attitudes and can be used in subsequent research. The result is research that uses the Follower Analyzer on Instagram on Social Networking Sites (SNS) can develop in dynamics and be a domino effect on political attitudes.

Keyword: Instagram, Coronavirus and Political Attitudes.

Introduction
By 2020, social networking sites (SNS) have become the main communication tools in the online community (Lampel & Bhalla, 2007), (Schwännlein & Wodzicki, 2012) where almost everyone develops their online networks. Instagram is a social networking site (SNS) a vital research context in investigating the process (Boyd & Ellison, 2007). The presence of Instagram contributes a lot to users of social networking sites (SNS). In its use, Instagram is used in a variety of social and political life through photo and video content, allowing anyone to access information. Social media capabilities can enhance presentations (Rosenberg & Egbert, 2011), (Van Der Heide, D’Angelo, & Schumaker, 2012) and (Rothmund, Bender, Nauroth, & Gollwitzer, 2015) and (Vitak, 2012).

Instagram becomes a culture on social networking sites (SNS) in sharing photo and video content using mobile phones. Instagram as a media that allows users to convert photos into memory to be stored forever. Instagram users record their stories through photos and short videos. Unlike other media, Instagram with existing content can create a culture of visual orientation towards followers. With photo and video content that has editing features, which can be adjusted by Instagram users. Full features in creating content on photos and videos, providing convenience and immediate steps in creating content for Instagram users. This makes it
possible for users to track photos and videos geographically and notices of existing content information.

While the photo and video base on Instagram makes it unique and has an operating system that can be used on Apple, iOS, and Google Android systems, Instagram users can access via their mobile anywhere, anytime with virtual. Social networking sites (SNS) do have characteristics that affect the culture of visual orientation and political attitudes.

**Instagram Impact**
The beginning of 2020 is almost all countries affected by Coronavirus outbreaks, where social networking sites (SNS) Instagram present provide information openly. Coronavirus outbreaks spread very quickly in a matter of days and months. There are currently an estimated 152 countries affected by the Coronavirus.

Social networking sites (SNS) exert influence on political and social aspects, where state decisions affect the safety of citizens. Content that is spread both photos and videos affect the political attitudes of citizens on social networking sites (SNS), values, moments, expressions, concepts, and policies are significant psychological factors that influence citizens' social politics in political attitudes. Social networking sites (SNS) may direct political issues so that it impacts on political attitudes in upcoming elections.

**Methods**
Follower Analyzer is an operating system developed by Maximo Lab, and the latest version of the Follower Analyzer for Instagram 7.4.5 was updated on August 2, 2019. This application can be downloaded on Android 5.0+ from APKFab or Google Play. Follower Analyzer operating system can find some exciting profiles on Instagram, and this Follower Analyzer can find out who always likes and comment on their posts and others.

Follower Analyzer is an application that helps and simplifies the use of data on Instagram. With the Follower Analyzer, we can not only gain more insight into our profile but can also unlock many of our friends' secrets. Follower Analyzer has many features that will make it easier for users of social networking sites (SNS).

**Data Source**
In early 2020, a search was carried out with the Instagram social networking site (SNS) database to identify posts with the following search strategy: TOPIC "coronavirus." This strategy looks for social networking sites (SNS) on Instagram related to coronavirus that have an impact on political attitudes.

**General Results**
in figure 1, the results of a social networking site (SNS) search on the topic "Coronavirus" with Instagram users named "Coronavirus" made 59 March posts in 2020, taking into
account 15204 followers, 19 followings, five most marked, 312589 likes, 20656 comments, 15 photo locations, 27799 total top likes, 11182 total top commentators, 32 videos watched the most, and 143 results.

**Figure 1** Coronavirus News And Media Website

![Graph showing statistical data for various categories such as posts, followers, following, most marked, like, and comment with Series1 having 59 posts, 115204 followers, 19 followings, 5 most marked, 312589 likes, and 20656 comments.]

Figure 2 illustrates the number of Most Marked on "Coronavirus" Instagram users. The graph shows that the number of Most Marked with realdonaldtrump is 5423 posts and has 18096730 followers, second Samsungturiyke 1444 posts with 368524 followers, third apple 637 posts with 22710412 followers, four mikepence 356 posts with 769704 followers, and the fifth is drtedros 259 posts with 13741 followers.

Conclusion

The results of this study researchers note the posts, and researchers consider the application of the Follower Analyzer technique. This includes digital-based methods and is very useful in social networking site research (SNS). So the researchers can measure the impact of social networking sites (SNS) on other users by paying attention to features and indicators.

The Followers Analysis Tool supports approved, newly created. Also, this publication is a triangulation with empirical verification and previous studies conducted by other researchers with theoretical contributions, because it increases the knowledge already (Lee, Lee, Moon, & Sung, 2015), (Smith & Sanderson, 2015) and (Ridgway & Clayton, 2016).

Is a Lecturer at the Institute of Domestic Government. Has the Position of Head of the Center in Community Service Institutions. Has served as a Director at the Institute for Domestic Government, West Kalimantan Campus. Focusing on Scopus Research with Governmental Sciences. Currently Doing Research In Regions And Archipelago. The Research That Has Been Conducted Is First The Effect Of The Village Fund Program On The Level Of Community Participation In The North Galesong District Of Takalar Regency, The Second The Factors That Affect The Success Of The Poor Community Empowerment Program In Polongbangkeng Utara Selatan Subdistrict, Takalar District, South Sulawesi Province Learning Media In Motivating Student Learning, Fourth Quality Of Service Manufacturing Of Trade License Line In Office Of Investment And Licensed Agency (Bpmpt) Regency Of Bulukumba, Fifth An Effort To Improve The Quality Of Workers At The Makassar City Department Of Employment Services, Sixth Strategy Of Governance In Transportation Policy Implementation: Case Study Of Bus Rapid Transit (Brt) Program In Makassar City And The Seventh The Impact Of Village Expansion Policy On Public Service Aspects At Sadar Village Bone-Bone District Of North Luwu Regency.

He is a lecturer at the Makassar campus internal government institute, currently serving as the head of the service office for the information and technology services unit at the Makassar campus internal government institute. As for several studies and books that have been published, the first is Community Empowerment, the second is the Implications of the Village Fund Program on Social Cohesion in Tamalate Village, Takalar Regency, the third is Social Capital for Entrepreneur Entrants in Takalar Regency, South Sulawesi Province, the fourth is Employee Performance at the Office of Population and Civil Registration in Nort Marowali Regency and the fifth Government Ethics. Currently has a focus on community empowerment expertise in several regions in Indonesia. The areas with the focus are Sumatra, Java, Kalimantan, Sulawesi, Nusa Tenggara and Irian Jaya areas. Currently undertaking deepening of research quantitative methodology, which supports every aspect of research in the regions in Indonesia.

Ruliando Hasea Purba is a lecturer or lecturer at the state university in Jakarta. Is a specialist doctor with physical and rehabilitation expertise. He is currently pursuing his education to become a doctoral candidate at the medical faculty at the University of Indonesia. As a doctor, he contributed to the association of Indonesian doctors starting in 1999. By having 95 (ninety-five) medical training awards or certificates. He has been the head of a clinic at a state university in Jakarta, and a contingent doctor for the ASEAN university games (AUG) in Myanmar in 2018. In the next research, therapy is carried out to restore body functions that are experiencing problems. Usually for someone who has
Ruliando Hasea Purba has undergone medication or surgery due to severe injuries, infections, strokes, or tumors and has paid attention to the process of rehabilitating a person to avoid physical disabilities due to injury or disease. This therapy is carried out through a series of preventive measures, diagnosis, and treatment to treat physical disorders. One of the studies in the near future is IMT And VO2MAX Analysis On Junior Athletes, Futsal And Football Branches.

Selfi Ami Susanti is a Praja or a student designation at the domestic government institute (IPDN), majoring in government policy and government political faculties. The focus of my research is on political attitudes. I am a research assistant from Muhammad Adam Suryadilaga. I work for the Republic of Indonesia's interior ministry. Interest in political attitudes in political science, such as political attitudes with elections, political attitudes with community leaders, political attitudes with family relations, political attitudes with gender, and political attitudes in identity. The next research is research on political attitudes with leaders as religious organizations. So that it can make a major contribution to the theory of political attitudes and political attitudes in all countries. The methodology used is qualitative with Nvivo and Quantitative approaches with Vosviewer.
