Dear  
Muhadam Labolo  
Institut Pemerintahan Dalam Negeri (IPDN), Sumedang, Indonesia

The DIALOGOS Editorial Board has reviewed your article, the research topic is very interesting, but we decided that your article could not be accepted immediately. You must improve your article on several points.

I am sure you are willing to make this improvement because your scientific articles must meet DIALOGOS standards.

Please correct your article according to the instructions from the DIALOGOS Reviewers.

#### REVIEWER 1

1. This article is very actual and interesting, but the author needs to show the novelty of this research. I think the novelty claim is still not that strong
2. Literature review needs to be strengthened to discuss problems
3. The author must explain the method used in this study in detail until the data analysis
4. The results and discussion need to be compared with previous findings so that the novelty of this study is clearer
5. References need to be reproduced with the latest journals relevant to the research theme

#### REVIEWER 2

1. Show why this research is important or urgent to do in relation to the blankness of literature
2. Abstract is too long and wordy, the abstract must be concise and interesting that shows the problems, objectives, methods and novelty of the research results.
3. The author must map similar studies beforehand to show the novelty of this research
4. The discussion is not in depth, so deepen the discussion with the findings of previous researchers
5. References need to be added to the latest relevant journal articles in the last 5 years.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Best Regards,

Dear

Muhadam Labolo  
Institut Pemerintahan Dalam Negeri (IPDN), Sumedang, Indonesia

Based on Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

### REVIEWER 1

1. Abstract must be made in a solid, consisting of all essential things related to the written topic, not repeating the conclusions of the research you have done.
2. The discussion section must be deepened, the author must relate the topics discussed with previous references. In this section the discussion is still weak because the references cited do not support it.
3. Conclusions should be concise and clearly explain the core findings of the study.

### REVIEWER 2

1. The existing method does not describe in detail the research process carried out.
2. The conclusions do not describe the overall results.
3. The references must be current and in the form of a journal article
4. The author must explain what the limitations of this study are.

Articles that have been revised and please send it back via this email.

Best Regards,
