Waseda University POLITICAL STUDIES REVIEW: 2013 VOL 11, 52-64 doi:  
10.1111/j.1478-9302.2012.00286.x This article presents a systematic review of the literature of  
oligarchy in Indonesia, which offers a distinctive interpretation of political change in Indonesia. The  
article argues that this literature is significant in two important ways. First, it invites ongoing  
rethinking of the ways in which authoritarian regimes fall. In the mainstream literature of  
democratisation, the fall of authoritarian regimes is often portrayed as the triumph of pro-democratic civil society  
mobilisation. Whereas many Indonesianists embrace this mainstream account in explaining the fall of the Suharto  
regime, the oligarchy literature suggests that its fall was driven not so much by the rise of civil society forces as by  
tensions between Suharto and oligarchs, in which the former was abandoned by the latter. Second, the oligarchy  
literature also compels a reappraisal of the nature of Indonesia's new democracy. Unlike the mainstream account of  
democratisation, which holds an optimistic view that the country is in the 'consolidation' stage towards a liberal  
democracy, the oligarchy literature sees political transition in Indonesia as a journey to an illiberal type of  
democracy: namely, oligarchical democracy.
